

2 Wire Surveillance Kit

PLATINUM Series

P2W-AT7

Description

IMPACT™'s new P2W-AT7 is identical to our best selling Platinum two-wire kit but fitted with a state of the art Knowles™ brand armature speaker and surgical grade clear straight tube. The straight tube offers several benefits over the standard coil clear tube; sound blocking condensation build up is reduced or completely eliminated with the straight tube and the distance sound must travel from the speaker to the ear bud is considerably less and more direct than a coil tube which enhances clarity and volume. The Knowles™ brand armature speaker sets the IMPACT™ P2W-AT7 above the competition by offering the most high quality, crystal clear audio reception at any volume level.

Features

- Anchored Kevlar™ reinforced cable
- Full size PTT with Knowles™ brand MEMS surface mount mic, screen mic cover and clothing clip
- Knowles™ brand top quality armature speaker offers the ultimate in crystal clear voice reception
- Surgical grade straight clear tube reduces moisture build up and audio quality reduction
- Three year warranty

PXT-AT7

Description

The IMPACT™ PXT-AT7 is an add-on straight wire fitted with our top of the line Knowles™ brand armature speaker and straight tube. Designed to easily be attached to the standard 2 pin conical pin connectors used on most brand surveillance kits.

Simply remove the standard round transducer speaker, clip on the PXT-AT7 to upgrade to the clearest, most reliable surveillance ear option on the market.

Features

- Anchored Kevlar™ reinforced cable
- Clip on to all IMPACT™ platinum surveillance wire kits. Compatible with most other brand kits as well
- Knowles™ brand top quality armature speaker offers the ultimate in crystal clear voice reception
- Surgical grade straight clear tube reduces moisture build up and audio quality reduction
- Three year warranty
