

QDAT-1

Features

Clear acoustic tube with elbow and ear bud for IMPACT's Gold and Platinum Series products.
Compatible with all industry standard and OEM products.

CB

Features

Soft, Light and Stable for upgraded comfort and extended wear.
Compatible with all industry standard acoustic tubes from any supplier.

Ear Bud

Features

Soft rubber ear buds. Available in black, clear or beige.

ME-1

Features

Soft Silica Gel molded open ear inserts. Used as a replacement for standard mushroom style ear buds on all acoustic tube audio accessories.
Allows for comfortable extended wear and the clear audio reception of background or ambient sounds.

HP

Features

A Pair of Earplugs with Passive talk-through technology. Allows the wearer to hear but protects from loud noises.
Can be used with or without radio communications, via acoustic tube mounting.
Attenuation increases as noise increases.

NAP-1

Features

Noise attenuating plug for use on all IMPACT™ brand acoustic tube products.
With an NRR(Noise Reduction Rating) of -24dB, this plug reduces ambient noise by up to 42db for clear audio reception in high noise environments.
Coated, dense foam rubber construction for easy cleaning and extended life.

DBEP

Features

The dB Buster™ ear plugs are the perfect choice when wanting to block high levels of ambient noise and still clearly and safely hear your radio transmission.
Ideal for shooting, construction, industrial applications, and loud music venues.

WE-1

Features

The entire Quick Disconnect Assembly setup.
Includes clip assembly, transducer and quick disconnect coiled acoustic tube.
