

Recommended Installation:

- Bolt the unit to a suitable flat surface in the vehicle.
- It is recommended that fender washers and lock nuts be used on the back side of the mounting surface.
- Self-drilling screws are not recommended.

Installation & Removal of Charging Station:

- Place the charging station on the base and pull back while pushing down lightly. The tabs will engage the slot in the charging station.
- Pull the locking plate back so it locks the charging station in place.
- Tighten the two wing nuts to secure.
- To remove the charging station, loosen the wing nuts, push the charging station forward, and lift up.

Additional Notes:

- If a bungee cord is too long or too short, adjust the position of the knot accordingly.
