# Stop the Spread!

Germs and viruses move from person to person through sneezes, coughs, breath, saliva and touch. Regular cleaning of surfaces and objects is one way to combat the spread of germs but the single best way to avoid transmission is to physical distance from others. In offices, schools, businesses and other environments where this is often impossible, the Impact Safety Shield helps stop germs in their tracks!

An effective, simple and cost effective solution to help you and your team stay safe, feel protected, and get back to the new normal!

## Prevent the Spread with a Shield

A physical barrier is recommended where social distancing is not possible to comply with COVID protocols. It will also assist with reducing the spread of other bacteria and viruses such as the common cold.

## Why choose Impact Safety Shield?

- **Versatile:** Adjustable to suit almost every desk shape and size
- **Affordable:** Lower priced than Plexiglass alternatives and cheaper to ship
- **Portable:** Easily move to different desks or take it on the road (desk clamp also available)
- **Easy to install:** Anyone can set up in minutes with NO TOOLS!
- **Easy to clean:** Simply use a multi-surface cleaner and dry cloth
- **Effective:** Simple solution to stop the spread of harmful germs
- **Easy to store:** When no longer needed, Shields can be rolled up and easily stored
- **100% recyclable**
- **Patent pending**

"We now have all our staff back at work thanks to the shields. They provide extra protection and peace of mind so staff feel it's safe to be back at work. Ideal for anyone in an office environment."

**Calm Homes Ltd**
